PROFILE

Power BI & Data Analytics Engineer with 3+ years of experience specializing in enterprise Power BI, Microsoft Fabric, operational analytics, and AI-assisted BI development workflows. Experienced in delivering scalable dashboards and predictive insights that support strategic decision making across telecom infrastructure, manufacturing, logistics, finance, and executive reporting domains with strong focus on operational efficiency, automation, and business decision support.

CORE SKILLS

- Power BI / DAX / Power Query
- Microsoft Fabric
- SQL / Python / Spark
- ETL & Data Modeling
- Agentic & AI-Assisted Development (Cursor, Claude Code)
- Tabular Editor / DAX Studio / Measure Killer
- GIT / JIRA / Confluence
- Operational Analytics
- SAP Operational Reporting
- Telecom & Manufacturing Analytics

CERTIFICATIONS

DP-600 Fabric Analytics Engineer Associate - In Progress

EDUCATION

BSc (Hons) Engineering

University of Moratuwa

Electrical Engineering

Second Class Upper | GPA 3.64
2010 - 2015

OTHM Level 7 Diploma in Data Science

OTHM, UK | 2024

WORK EXPERIENCE

POWER BI ENGINEER

Raketman (Pvt) Ltd – Vandermarliere Family of Cigars (Belgium) | May 2025 – Present

- **Data owner for 20+ Power BI reporting solutions** spanning supply chain, logistics, inventory, production, finance, and group-level operations ensuring accuracy, governance, and consistent delivery. The reports are actively used by managers, assistant managers, supervisors, and operational teams up to Group CEO enabling end-to-end operational visibility for data-driven decision making.
- **Integrated SAP data sources to automate** previously **manual** Excel-based reporting workflows, reducing reporting effort and turnaround time.
- **Large scale Power BI reporting solutions** including Warehouse KPIs, Tobacco Budget, Cigar Composition, and Tobacco Duration analytics supporting BOM analysis, inventory visibility, consumption forecasting, operational reliability and procurement planning.
- **Agentic coding and AI-assisted development** workflows using Cursor and Claude Code to accelerate report development, DAX authoring, debugging, governance, version control, documentation, and automate data transformation processes.
- **Utilized advanced Power BI capabilities** including Calculation Groups, Field Parameters, Row-Level Security (RLS), and Power BI Service-based reporting workflows.

Key Responsibilities

- Lead requirement gathering workshops with business stakeholders to understand analytical needs and translate them into well defined technical specifications and project scope documents.
- Design and present proof of concepts and interactive report mockups to validate data models, visualization approaches, and stakeholder expectations before the development phase.
- Define and enforce UI and UX design standards for Power BI dashboards to ensure consistency, usability, and high-quality user experience across enterprise reports.
- Deliver end to end Power BI solutions including data modeling, advanced DAX development, report design, performance optimization, and deployment.
- Manage Power BI Service configurations including workspace governance, dataset refresh scheduling, security roles, and report deployment across environments.
- Perform comprehensive data validation across frontend reports, backend data sources, and query logic to ensure data accuracy, reliability, and business trust in analytics solutions.
- Built scalable analytical models utilizing advanced DAX, optimized semantic modeling, and streamlined refresh pipelines to support high-volume operational reporting.

SPECIALIST REGIONAL OPS – ANALYTICS & AUTOMATION

Dialog Network Services (Pvt) Ltd | Jan 2023 – May 2025

- Designed and deployed 20+ operational analytics solutions supporting telecom infrastructure monitoring, disaster recovery coordination, SLA management, workforce operations, and infrastructure reliability.
- Developed disaster management analytics systems enabling prioritized field response and optimized resource utilization during large-scale infrastructure failures.
- Contributed to achieving **zero fire incidents** through implementation of critical alarms monitoring and infrastructure risk analytics.
- Delivered analytical solutions supporting optimized utilization of an **8 Bn LKR** annual operational budget for telecom infrastructure electricity management.
- Developed battery health and design backup monitoring solutions identifying infrastructure risks and reducing critical downtime scenarios.
- Built workforce and SLA management dashboards improving operational visibility, escalation tracking, and task completion monitoring across regional operations. Provided analytical insights and operational evidence supporting senior management decision making on field resource allocation and infrastructure planning.

ELECTRICAL ENGINEER / PLANT ENGINEER

Multiple Electrical Engineering Firms – Sri Lanka | May 2015 – Jan 2023

- Worked across renewable energy, power generation, transmission systems, and industrial manufacturing projects.
- Managed operations and maintenance activities for 3.3 MW Biomass and 100 MW Thermal Power Plants.

SELECTED PROJECTS

- Crypto Data Analysis – Real-time Coinbase API analytics solution using Python, Pandas, and Matplotlib.
- Technical Support Analytics Dashboard – Power BI dashboard developed for ONYX Data Challenge.
- UK Banking Analytics Dashboard – Tableau-based regional banking analytics solution.

MEMBERSHIPS & PUBLICATIONS

- AMIE (SL) — Institution of Engineers Sri Lanka
- AENG — Engineering Council Sri Lanka
- Published paper at ICIAFS 2014 on harmonic mitigation systems.
